PROFILE

As a computer science graduate with as solid foundation in python programming and a passion for innovation, I am eager to kick-start my career as a software developer. I am seeking an entry-level position that allows me to apply my technical skills, collaborate with experienced developers, and contribute to cutting-edge projects. My goal is to become a proficient software engineer while continuously enhancing my coding abilities and problem-solving expertise to deliver valuable software solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, C#
Databases: My SQL, SQLite
Framework: Django, React
Version Control: Git, GitHub
Web Technologies: HTML, CSS, JavaScript

EDUCATION

Bachelor of Computer Science, Gujarat Technological University, India.   **July 2019 – May 2022**

Diploma of Computer Engineering, Gujarat Technological University, India.   **Aug 2016 – April 2019**

TECHNICAL PROJECTS

Personal Website(React):
- Crafted with React, my personal website seamlessly blends creativity and functionality to showcase my professional journey through an interactive and visually engaging resume

To-Do list:(Python)
- Developed a dynamic and user-friendly To-Do List web application using the Python Django framework. This application serves as an efficient task management tool, allowing users to seamlessly organize and track their daily activities.

Weather Application: (python)
- I designed and implemented a versatile Weather Application using the Python Tkinter library, providing users with real-time weather information for different locations. This application seamlessly integrates multiple functionalities, including displaying the current time, temperature, humidity, and weather conditions.

E-commerce Website: (Python, HTML, CSS, JavaScript)
- Implementing an e-commerce project using Django framework. Proficient in creating a seamless user experience by integrating key features such as adding and removing items from the shopping cart. Implemented secure payment functionalities, allowing users to make transactions using both PayPal and credit cards.

Sorting Visualizer: (HTML, CSS, JavaScript, React)
- Developed a sorting visualization project using React, showcasing strong front-end skills. Designed an intuitive and visually appealing interface for displaying sorting algorithms in real-time. Demonstrated the ability to effectively communicate complex algorithms through clear and concise visualizations.
